

Networking breakfast: LCR 4.0 – Together for Manufacturing

14 September 2017

Speakers include:

Andy Levers - Virtual Engineering Centre (University of Liverpool)

Dr Andy Levers is the Technical lead for LCR 4.0 and is the Technical Director at the Virtual Engineering Centre as part of the University of Liverpool. Andy provides support and expertise around Industry 4.0 and sets the strategic technical priorities for the Virtual Engineering Centre as well as the LCR 4.0 project.

Alison Mitchell - Sensor City (University of Liverpool and Liverpool John Moores University)

Alison Mitchell is executive director at Sensor City, which will drive sensor technology and development across the UK.

Alison, who will lead the venture to establish it as a viable business and a key driver of economic growth for the Liverpool City Region, joined Sensor City from BT Business, where she was Chief Information Officer – a position in which she helped transform the telecom giant's products and services and technical delivery.
